Outlook priorities

4 Outlook

Three priorities carry the operations plan into the next quarter.

1. Extend the certified timber programme to every active supplier.
2. Open the second dispatch dock before winter, in three stages:
   - Pour and cure the concrete slab.
   - Fit the loading equipment:
     a. two dock levellers,
     b. one overhead door, and
     c. weather seals.
   - Commission the dock with two crews rostered.

   The dock remains closed to deliveries until the final inspection has been signed off by the site manager.
3. Keep warranty claims below one per cent of units shipped.

The appendices follow the priorities.

I. Supplier register
II. Freight rates
III. Audit schedule

Checklist items 98 to 100 continue the register; their labels widen the list's label column.

98. Confirm the freight insurer.
99. Renew the site lease.
100. Archive the audit files:
     VIII. contracts,
     IX. certificates.

- Plain-text bullets keep their generated disc
- and their ListNumbering attribute
