3 Supply chain

Freight and timber sourcing both improved this quarter. The two subsections below summarise the changes and the suppliers involved.

3.1 Freight

Consolidated sailings across Bass Strait reduced the number of part-loaded containers by a third. Average freight cost per shipped unit fell from AUD 41.20 to AUD 37.85.

Pick lists now come directly from the warehouse system `WMS-7`, which removed a manual re-keying step and halved picking errors at the Moonah yard.

3.2 Timber sourcing

Our partner Atelier Beaulieu puts it simply: « Le bois demande de la patience. » (“Timber asks for patience.”)

4 Outlook

Next quarter's priorities follow our published sustainability commitments.

1. Commission the third kiln chamber at Moonah by November.
2. Extend certified sourcing to every timber category:
   - audit the remaining two veneer mills;
   - require chain-of-custody records for recovered oak.
3. Hold on-time delivery above 96% through the December peak.

Appendix A. Supplier register

The register lists every supplier active at the end of the quarter, with spend in the quarter and certification status.
