Cold-chain telemetry export

Shipment RX-40718 · Vaccines, 2 to 8 °C · Melbourne distribution centre to Royal Hobart Hospital pharmacy

Status Delivered 30 September 05:40 · 1 excursion, about 90 min above 8.0 °C

Probe A min 3.6 °C · max 9.1 °C · mean 4.4 °C

Probe B min 3.4 °C · max 8.4 °C · mean 4.1 °C

Assessment Within the manufacturer's stability budget; quarantine not required

Temperature over the journey

Both probes stayed inside the safe band except during the loading-dock delay at Devonport, when the door was held open for 90 minutes. The logger raised alarm TEMP_HIGH at 20:30 and cleared it at 22:00.

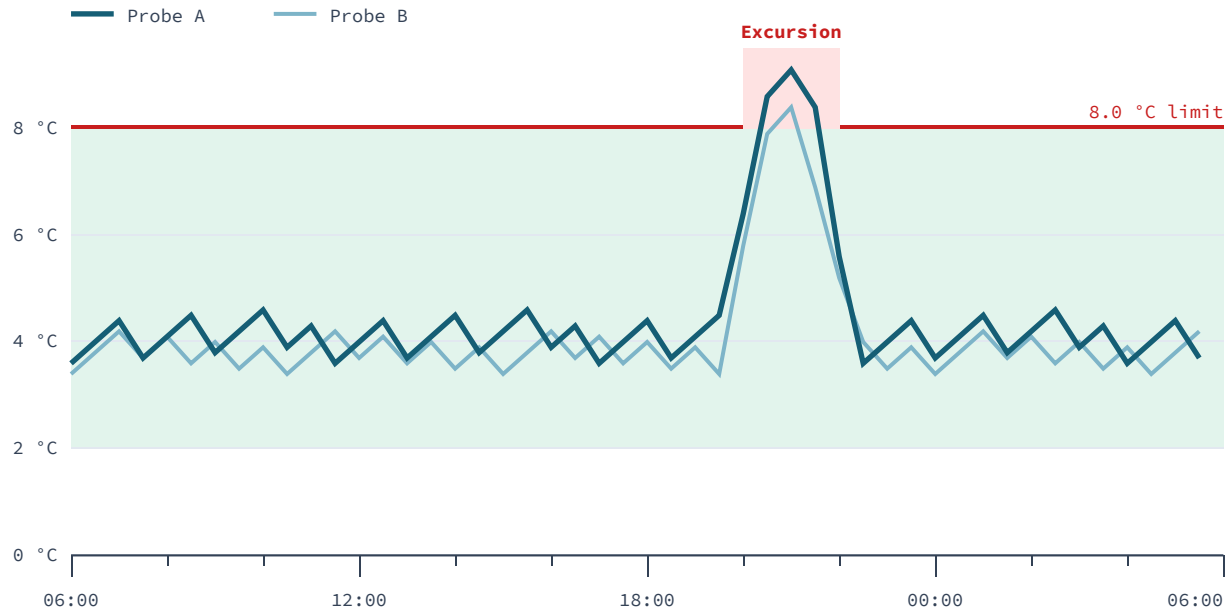

Figure 1. Probe A and probe B against the 2 to 8 °C band; ticks every 2 hours from 06:00

Excursion record

- **20:00** trailer door opened for transfer to the Bass Strait ferry.
- **21:00** peak of 9.1 °C at probe A, nearest the door.
- **22:00** both probes back below 8.0 °C; alarm cleared.

Readings

Readings in red exceed the 8.0 °C limit. The logger samples every minute; the table shows the half-hourly values the carrier reports.
